

THINK PCD COMPRESSIONS

68-100 SERIES

- **Longer Tool Life**
- **Clean Edge Finish**
- **Reduced Tooling Cost**
- **Resharpenable**

Onsrud is now offering a line of PCD (Polycrystalline Diamond) compression cutting tools for difficult to cut materials. The high-speed-steel body results in a durable tool while the PCD cutting edges greatly increase life resulting in increased productivity by the elimination of frequent tool changes.

Onsrud's single-edge offering will range from 3/8" to 3/4" diameters. The tool's PCD mortise tip also results in long life when plunge cutting. The compression design will ensure you get a chip-free edge both top and bottom.

Tools can be serviced but the economical design is an attractive alternative to more expensive tools.

PRODUCT OFFERING

PART #	CED	CEL	SHANK	OAL	FLUTES
68-100	3/8	1	1/2	3	1
68-102	1/2	1	1/2	3	1
68-104	5/8	1	5/8	3 1/2	1
68-106	3/4	1	3/4	4	1
68-110	5/8	1 5/8	5/8	4	1
68-112	3/4	1 5/8	3/4	4	1

Usage: Composite Wood, Melamine Sheet, Laminated Sheet,
Other Difficult to Cut Materials.
