

# PMG<sup>®</sup> Acrylics

## PMG<sup>®</sup> Plus

- PMG<sup>®</sup> Plus has superior optical quality over general purpose acrylics and is formulated to hold up even in the most extreme marine environments.
- Formulated with the Fabricator in mind, every batch of PMG<sup>®</sup> Plus is manufactured and tested prior to leaving the facility to eliminate down time at the fabricator or OEM.

## PMG<sup>®</sup> Ultra

- PMG<sup>®</sup> Ultra is an impact modified acrylic that provides unmatched performance and ease of fabricating parts.
- PMG<sup>®</sup> Ultra's formulation makes it a hardware friendly acrylic, reducing costs due to damaged or cracked parts simply from handling, overtightening fasteners while installing hardware, or just maintaining in a rigorous marine environment.

## PMG<sup>®</sup> Acrylic Mirror

- PMG<sup>®</sup> Acrylic Mirror is produced by the only vertically integrated supplier producing optimal quality through total control of the manufacturing process.
- The Acrylic sheets are manufactured to ASTM D4802-9 standard, hand selected and inspected prior to being mirror. This is done to produce the highest quality that the marine market demands.
- Abrasion Resistant Coating Available for added durability.

\*PMG<sup>®</sup> Acrylics also available in Solar Block and Heat Reflective.
